

SECON & eGISEC 2025 Press Release: Spotlight on Key Exhibitors

- Event Name: SECON & eGISEC 2025
- Event Dates: 19(Wed) – 21(Fri) March 2025
- Venue: Hall 3-5, KINTEX, Republic of Korea
- Website: [SECON 2025 - International Security Exhibition & Conference](#)
- Exhibitor List: [Exhibitor Digital Showroom | SECON & eGISEC 2025](#)
- Exhibit Category: Video Surveillance, Access Control, Smart City Security Solution, Social Security System, Homeland Security, Cyber Security, AI Security, Industrial Security/OT Security

The 24th edition of SECON & eGISEC 2025, Asia's premier integrated security exhibition encompassing both physical security and cybersecurity, will take place from 19-21 March, 2025, at Hall 3-5, KINTEX, Korea. With an expansive exhibition area of 28,000+ sqm, this year's event is set to welcome 30,000+ visitors and 400+ global leading security companies from 10+ countries, along with 100+ conference sessions across 30+ specialized tracks. Let's take a closer look at some of our key exhibitors and emerging companies across various security categories.

[Key Exhibitors and Products]

< Video Surveillance >

- **TP-LINK KOREA**

- **VIGI Surveillance Solution:**

A user-friendly and intelligent surveillance solution for SMBs, supporting various industries with cameras, NVRs, solar panels, and VMS.

- **VIGI CCTV Camera:**

AI-powered security cameras offering easy installation, real-time monitoring, and enhanced business security.

- **EMSTONE**

- **REDBACK VMS:**

A large-scale integrated video surveillance system supporting up to 1024 channels and seamless third-party integration.

- **IP Wall Control System:**

A scalable IP-based video wall solution with an intuitive interface, unlimited monitor arrays, and multi-user control.

- **SEYEON TECH**

- **FW7940-KSM:**

A high-performance 4K AI IP bullet camera with Sony Starvis CMOS sensor, deep learning AI features, and multiple video compression formats.

- **FW9709-QNR:**

A 4MP AI-powered PTZ camera with Sony Starvis sensor, AI auto-tracking, and advanced object detection capabilities.

- **WONWOO ENGINEERING**

- **Zoom Modules:**

Auto Focus Zoom Modules

- **WGK Series:**

Mechanical Rotation for Corridor View IR PTZ Camera

- **EYENIX**

- **HAAS:**

An AI-powered solution for enhancing analogy coaxial video surveillance with facial recognition and multi-class AI inference.

- **EN683:**

A high-performance SoC for consumer products and IP camera applications.

<Access Control>

- **SUPREMA**

- **New Biostar:**

An AI-based security platform integrating access control with video analytics and surveillance.

- **Biostar 2 VMS:**

A unified AI-powered solution combining access control and video management.

- **UNION COMMUNITY**

- **UBIO-X Face PRO:**

- A next-gen biometric device with a 5-inch LCD, 6-in-1 authentication, RFID integration, and Wi-Fi support.

- **IRIS ID**

- **IA1000:**

- A biometric device with both iris and facial recognition capabilities.

- **IT100:**

- A non-contact biometric system featuring iris and facial recognition technology.

- **SILICON BRIDGE**

- **Premium All-in-One License Plate Number Reader (AIO4P):**

- A cloud AI-based unmanned vehicle access control system with a license plate recognition camera and integrated control board.

<Smart City Security>

- **INNODEP**

- **VUCATCHER:**

- A next-generation AI-based screening control solution with enhanced object analysis performance.

- **REXGEN**

- **AI Video Analysis Solutions:**

- An intelligent event monitoring system for real-time object tracking and movement prediction.

- **Smart Enforcement System (Rex-Enforcement):**

- A traffic enforcement solution using non-inductive detectors for red light and speed violations.

- **VISION I&C**

- **Smart IoT Security Lights:**

- AI-powered security lights with automatic activation, IoT connectivity, and energy-efficient LED technology.

- **Thermal Positioning Camera (VSC_PSTBD4056K-S):**
A dual-spectrum thermal and optical imaging camera with real-time detection and long-range fire monitoring.

- **SAENoon**

- **Enterprise Management Center Asset Management Solution:**
An integrated CCTV database management system for efficient control centre operations.
- **Disaster Management Solution:**
A GIS-based real-time monitoring system for disaster response and data analysis.

- **ESCA**

- **Video Surveillance Device:**
A 2MP security camera with optical thin-film and software filters for enhanced low-light visibility.

<Social Security System>

- **HANWHA VISION**

- **AI Pack:**
Industry-specific AI analytics solutions for city surveillance, retail, and manufacturing.
- **AI Box:**
An AI-powered device that enhances existing cameras with real-time object detection and intelligent monitoring.

- **IDIS**

- **IDIS Flagship Zoom Bullet Series:**
A high-performance bullet camera lineup with advanced AI analytics and up to 8MP resolution.

- **VERKADA**

- **Security Camera:**
A cloud-based AI security camera with remote access and intelligent monitoring features.

- **Command:**
A centralized security management platform for real-time monitoring and analytics.
- **GREEN IT KOREA**
 - **Intelligent Integrated Control Platform, Observer:**
A real-time security control platform with automated failure detection and system recovery.
 - **Deep Learning AI Parking Control System:**
A video analysis-based parking management solution with vehicle detection sensors.
- **A AND T GLOBAL**
 - **CPTED Safety Signs:**
LED safety signs with customizable text and remote management capabilities for enhanced visibility.

<Homeland Security>

- **INTELLIVIX**
 - **GEN AMS:**
AI-powered safety monitoring system providing real-time alerts and automated incident reporting across public, industrial, and defence sectors.
 - **VIXcam:**
AI-based edge video analytics device with 4K resolution and 25+ event detection features for real-time surveillance and data processing.
- **INCON**
 - **Smart-I:**
The best control platform service for building a smart urban environment and monitors urban safety information in real time through public data linkage services.
 - **Accur8vision:**
LIDAR-based security system with precise spatial analysis, reducing false alarms to below 1% and tracking movement in real-time.

- **MIK SCAN**

- **AI-Based Security X-Ray Screening Equipment (KOR & ENG):**

- MIK SCAN is a leading developer of AI-based Security X-ray scanners, certified by the Korean government for aviation security, with a goal to become a global leader in security inspection equipment.

- **SELECS**

- **AI Smart Intrusion Detection System:**

- AI-driven perimeter security system with 99% detection accuracy, 0% false alarms, and applications in facility protection and disaster prevention.

- **SSTLABS**

- **E3S 690:**

- Korea's only ECAC EDSB C3-certified baggage screening system, reconstructing 2D images into 3D for enhanced threat detection.

- **E2S 620DV:**

- Dual-view X-ray system with bidirectional scanning for accurate screening in mail services, airports, and public transport hubs.

<Cyber security>

- **AHNLAB**

- **AHNLAB XDR:**

- Provides comprehensive threat detection, correlation analysis, and risk scoring across security domains.

- **AHNLAB EDR:**

- Next-gen threat detection and response, excelling in MITRE ATT&CK evaluations, with integration into MDR services for enhanced security.

- **WINS**

- **SNIPER ONE-I:**

- Intelligent intrusion prevention system offering real-time traffic analysis and blocking of intrusion attempts using a context-aware engine.

- **SNIPER-D:**

- DDoS defense system for real-time traffic analysis and blocking, ensuring network reliability and security against DoS and DDoS attacks.

- **ESTSECURITY**

- **ALYac Enterprise:**
Comprehensive security program offering real-time virus and malware scanning to protect systems.
- **SECUREDISK:**
Document centralization solution to prevent data leakage by storing files securely on a central server.

- **WEEDS KOREA**

- **Weeds Blackbox Suite:**
Comprehensive solution for managing personal information access logs and addressing abnormal behaviour.
- **Weed Board:**
Analyses business records like personal information access logs and automates responses to abnormal activities.

- **PNPSECURE**

- **DBSAFER DB:**
Prevents personal information leakage through access management and SQL audit, with strong security measures and multi-platform support.
- **DBSAFER AM:**
Manages user access and permissions, linking with DBSAFER DB for enhanced server access control.

<AI Security>

- **IGLOO CORPORATION**

- **SPiDER ExD (SIEM, Security Information & Event Management):**
XDR-based next-gen security platform offering unified security processes and proactive threat response capabilities.
- **SPiDER SOAR (Security Orchestration, Automation, and Response):**
Automates security threat response to enhance security operations through validated playbooks and tight integration with other security solutions.

- **CPRO**

- **NST17-78-RA:**
High-end megapixel IP AI PTZ camera for superior surveillance performance.
- **NVM9-720-R:**
High-end megapixel IP bullet camera for clear and detailed surveillance.

- **TRUEN**

- **TA-PA84N10R:**
High-End Megapixel IP AI Compact PTZ
- **TA-B4803T1R:**
High-End Megapixel IP Bullet Camera

- **SECURE LAYER**

- **EycloudXAR:**
Integrated Security Analysis and Response Solution
- **SysloudAI:**
AI Analytics Solution

- **MARK ANY**

- **Screen TRACER:**
Invisible watermarking solution to prevent data leakage by embedding user identification on work PC screens.
- **SmartEye for Finder:**
AI-powered search solution for locating missing persons and tracking specific attributes in surveillance footage.

<Industrial Security & OT Security>

- **NAONWORKS**

- **CEREBRO-XTD:**
OT visibility and threat detection solution for industrial environments.

- **CEREBRO-DD:**
Unidirectional security gate (Data Diode) to protect critical systems from external threats.
- **TOCSG (NOZOMI)**
 - **BSONE-All-in-One:**
Endpoint security solution offering context-aware protection for industrial networks.
 - **BSD-Malicious Email Response:**
Training solution designed to mitigate malicious email threats in industrial settings.
- **HUNESION**
 - **i-one Net:**
Network-linked security solution applying zero-trust technology for cloud security and multi-network configuration.
 - **i-one NAC:**
Network access control solution to block unauthorized access and secure information assets in IT environments.
- **HANDREAMNET**
 - **SubGate:**
Security switch for internal network security, providing threat detection and blocking in real-time.
 - **ISG Series:**
Industrial security switch offering optimized protection for smart factories and IoT networks.
- **TENABLE (ROLTECH)**
 - **Tenable Enclave Security:**
Specialized container security solution offering real-time vulnerability scanning in private cloud environments.
 - **Tenable Patch Management:**
AI-driven patch management solution automating vulnerability prioritization and patch deployment.

SECON | eGISEC 2025

Beyond these featured exhibitors, SECON & eGISEC 2025 will host 400+ global leading security companies from 10+ countries, making it a must-attend event for industry professionals.

To explore more exhibitors and discover cutting-edge security solutions, visit the Exhibitor Digital Showroom. There, you can find detailed company introductions, product information, and even arrange direct business meetings with exhibitors.

Join us at SECON & eGISEC 2025 and stay ahead in the ever-evolving security landscape.
