

Pre- Show Release

March 2025

- Event Name: SECON & eGISEC 2025
- Event Dates: 19(Wed) – 21(Fri) March 2025
- Venue: Hall 3-5, KINTEX, Republic of Korea
- Website: <https://www.seconexpo.com/2025/eng/main.asp>

SECON & eGISEC 2025: A Glimpse into the Future of the Security Industry in 2025

- Asia's only Integrated security exhibition representing the latest security trends.
- Participation from 400+ exhibitors, 10+ countries and 30,000+ visitors
- 100+ qualified buyers from 12+ countries, invited for a dedicated business matchmaking program
- Various conference & seminar programme focusing on cutting-edge solutions and security guidelines

The 24th SECON & eGISEC 2025, Asia's only integrated security exhibition covering both physical and cybersecurity fields, will take place from March 19 to 21 at Hall 3-5 Kintex, Korea.

This year's exhibition will cover 28,000+ m² of gross space, 30,000+ visitors, and 400+ exhibitors from 10+ countries. It offers a significant opportunity to explore the latest technologies and a diverse range of security solutions all in one place.

Featured exhibit categories will include Video Surveillance, Cyber security, Access Control, AI Security, Industrial Security/OT Security, Social Security System, Homeland Security and Smart City Security Solution. Detailed information on exhibitors and the exhibit profile can be found via the digital showroom link below.

Rising Demand for Advanced Security Solutions in a Rapidly Changing Global Security Market

In 2025, the importance of physical and cybersecurity has significantly increased worldwide, including in Korea, due to political issues and the emergence of China's AI model "DeepSeek." As a result, the demand for security is expected to surge, and SECON & eGISEC 2025 is anticipated to attract more visitors looking to explore the latest security trends and technological developments at the exhibition.

Notably, Korea plays a key role as a testbed for validating and demonstrating new technologies in the Asian security market. This is due to the country's stringent security regulations and rapidly evolving threat landscape, which serve as critical benchmarks for assessing the reliability and effectiveness of security technologies. As a result, SECON & eGISEC 2025, Korea's largest security exhibition, provides an ideal opportunity for global security companies looking to expand their presence in the Asian market.

[SECON & eGISEC 2025 Key Highlights]

Exhibition

SECON & eGISEC 2025 will showcase the latest advancements in physical and cyber security, including video surveillance, access control, and biometric authentication, alongside cybersecurity solutions such as network security and endpoint protection. Additionally, the exhibition will feature cutting-edge security technologies across various sectors, including industrial security, smart city security, operational technology (OT) security, automotive and maritime security, and drone-based security solutions.

With the increasing adoption of big data, cloud computing, and the Internet of Things (IoT) across industries, the significance of cloud and IoT security has never been greater. This year's exhibition will place a strong emphasis on AI-powered security solutions, particularly in intelligent security monitoring, threat detection, and automated defense systems, reflecting the growing role of artificial intelligence in modern security infrastructure.

Furthermore, sectors such as smart city security, related to urban infrastructure, as well as automotive and maritime security, which are becoming increasingly advanced with the rise of autonomous vehicles and smart ships, are expected to receive significant attention. Drone technology is also anticipated to be a key focus.

Conferences and Seminars

SECON & eGISEC 2025 will feature an extensive conference and seminar program, organized in collaboration with leading institutions and industry experts. With 30+ tracks and 100+ sessions, the program will provide valuable insights into industrial security, integrated CCTV control, aviation security, counterterrorism strategies, and personal data protection and more.

In particular, the Security World Conference 2025 will begin with a presentation on "PC and Mobile Antivirus Performance Analysis," followed by four sessions: "Overview of the Current Status of the Video Security SoC Market – Korea and International," "Security Challenges in the Mobile (SNS) Environment," and "Device Security in the Internet of Things (IoT) Ecosystem."

The Security World Conference 2025 will be held on the second day of the event, 20 March, at 1:00 PM in Conference Room 212, and all sessions will be provided with complimentary simultaneous interpretation services in English and Korean for attendees.

Overseas Business Networking and Support Programs

This year, 400+ exhibitors from 10+ countries will showcase their latest products and solutions. The event will also welcome VIP invited buyers and professionals from 12+ countries across the security, safety, and defense industries, providing them with opportunities to experience advanced technologies and participate in a dedicated business matching program.

With an expected attendance of 30,000+ visitors from worldwide, the exhibition will bring together security and information protection professionals, procurement specialists, system Integrators (SI), system Operators (SO), as well as CISOs, CPOs, CIOs, developers, and programmers from various sectors.

Building a Sustainable Exhibition with SECON & eGISEC 2025's Green Initiatives

K-ICT Startup Pavilion for Fostering the Growth of Startup Companies

The K-ICT Startup Pavilion will support the growth and advancement of promising startups in the ICT and security sectors. By selecting and promoting innovative companies, the Pavilion aims to enhance the value of emerging businesses and provide practical support for their expansion. Visitors will have the opportunity to explore the latest technologies and solutions from startup companies in the exhibition hall, while exhibitors will benefit from the chance to meet with potential clients, gaining valuable insights into the needs of site through meaningful communication and exchange. This will create an interactive hub for identifying market needs, fostering collaboration, and driving business opportunities.

Sustainable Exhibition Through Paperless Events

As part of its ongoing sustainability campaign, SECON & eGISEC 2025 is transitioning to digital formats for materials such as the digital showroom and on-site show guides, minimizing the use of printed materials. In cases where possible printed materials are unavoidable, only recycled paper certified for sustainability will be used.

Additionally, to minimize waste, carpets will not be used in booths and function rooms where possible. In these areas, reusable carpets will be utilized, and no carpets will be used in the aisles to further reduce waste.
