

Asia Photonics Expo 2024: Ideal Integrated Photonics Platform to Explore Cutting-edge Technologies and Emerging Application Markets in Asia

Organized by Informa Markets, the world's leading exhibition organizer, Asia Photonics Expo (APE 2024) will be held at Sands Convention and Exhibition Centre in Singapore from March 6-8, 2024. As a significant photonics event in Asia, APE 2024 focuses on the latest cutting-edge innovative technologies and the emerging application markets in Asia, aiming to promote in-depth communication and business collaboration between photonics upstream and downstream professionals.

One-stop Photonics Platform Provides Optimal Visiting Experience

As the one-stop photonics platform for industry players to technical communication, networking, and product sourcing, APE will cover the entire optoelectronic ecosystem to showcase the latest products in optical communication, precision optics, laser, infrared, sensor, and display fields, targeting the top-notch optoelectronic innovative technologies and solutions of nine major application areas in optical communication/information processing and storage, consumer electronics, advanced manufacturing, surveillance and security, semiconductor processing, energy, sensing and measurement, lighting and display, and medical. It can not only provide visitors with a more efficient one-stop visiting experience but also offers industry professionals and buyers the best opportunities to catch up with the latest industry trends, insights into market development, and facilitate business negotiations. Currently, APE has attracted pavilions from countries and regions such as China (including Taiwan, Hong Kong, Fuzhou, Xiamen, etc.), Japan, South Korea, Singapore, the United States, and Europe, sharing the latest cutting-edge photonics technologies and products. [Register now](#) to get the latest updates for APE 2024.

Keep up With Industry Trends, Tailor Professional and Abundant Concurrent Events

During the exhibition, APE will hold a three-day academic and industry forum, inviting photonics industry experts, research institutions, and university scholars to share cutting-edge photonics technologies, industry hot topics, and innovative application scenarios on site, aiming to gain insights into new trends in photonics and focus on the integration of academia, industry, research, and application. Highlighted by UNESCO's International Day of Light, Asia Light Conference 2024 will invite renowned academicians, experts, and scholars from home and abroad in the field of optics and related fields to participate in the exchange, building a high-level academic exchange and photonic product display platform for domestic and international scientific researchers and industrial technicians, which could comprehensively showcase the latest achievements at the forefront of optics and photonics. Regarding the applications in the photonics industry, APE will host a series of application conferences on hot topics such as **optical network technology development trend for the era of computing power**,

next-generation data center optical interconnect technology evolution, nanoimprint, micro-nano direct writing lithography technology, gray high-light lithography, precision machining, optical inspection, the development of advanced lithography processes and equipment, advancements in thin film deposition equipment, cutting-edge packaging technologies, semiconductor process, and wafer inspection, etc. Additionally, Made in China will host the Made in China Overseas Business Matching and EPIC will organize EPIC - Tech Watch during the exhibition. Furthermore, APE will also organize factory tour for enterprises, providing more in-depth learning and communication opportunities for companies to visit local research institutes, R&D centers, and companies in Singapore.

VIP Buyer Program Offering Exclusive Services

Business matching brings opportunities closer to brands by connecting upstream and downstream resources efficiently and accurately. APE VIP Buyer Program is featured by the tailor-made VIP service exclusively for key buyers and senior decision makers from the optoelectronic industry, who have specific sourcing needs or purchasing plans for new projects or products. As Asia's one-stop optoelectronic platform, APE aims to build up the bonding relationship between buyers and vendors by delivering the fruitful and efficient business matchmaking. Through pre-show email invitations, APE organizer can get insight to buyers' procurement demands so as to recommend target exhibitors and product lists that match their needs, which could facilitate more precise and efficient one-on-one procurement connections, creating new business opportunities.

Secure Your Free Pass Now to Get Pre-show Guide Beforehand

Click [HERE](#) to get your admission to APE 2024 now, you can enjoy:

- Fast track for badge pick-up
- Advance tips for traffic and accommodation
- Access to APE pre-show news and updates
- Invitation letter assistance for Singapore visa

APE booth application is heating up. Only limited number of booths are available, [reserve your booth now](#) and secure your presence at APE 2024!

About Asia Photonics Expo

Organized by Informa Markets - the world's leading tradeshow organizer, Asia Photonics Expo (APE) will be held at Sands Expo and Convention Centre in Singapore from March 6-8, 2024. APE will focus on the latest cutting-edge innovative technologies and the emerging application markets in Asia, aiming to promote the in-depth communication and business collaboration between the photonics upstream and downstream professionals. It will cover the entire optoelectronic ecosystem to showcase the latest products in optical communication, precision optics, laser, infrared, sensor, and display fields, targeting the top-notch optoelectronic innovative technologies and solutions of nine major application areas in optical communication/information processing and storage, consumer electronics, advanced manufacturing, surveillance and security, semiconductor processing, energy, sensing and measurement, lighting and display, and medical. APE is the one-stop sourcing platform for industry players to find new products and technologies and follow market trends. With an exhibition area of 15,000 square meters, APE is expected to attract 400+ enterprises, and more than 5,000 visitors to attend the show. During the exhibition, APE will also hold a variety of concurrent events, such as academic conferences and industry forums for future trends, cutting-edge technologies, industry hotspots, etc., site tours to research institutes, R&D centers, and local companies, as well as high-end networking opportunities including one-on-one business matching. About Informa Markets

Asia Photonics Expo is organised by Informa Markets, a division of Informa plc. Informa Markets creates platforms for industries and specialist markets to trade, innovate and grow. We provide marketplace participants around the globe with opportunities to engage, experience and do business through face-to-face exhibitions, targeted digital services, and actionable data solutions. Through more than 550 international B2B brands and over 260 conference brands in specialist areas, we connect buyers and sellers across fifteen core areas, including science and technology, life sciences, maritime, advanced manufacturing, and industry. As the world's leading market-making company, we bring a diverse range of specialist markets to life, unlocking opportunities and helping them to thrive 365 days of the year.
