

Pre-Show Press Release | March 2026

Event Fact Sheet

- Event Name: SECON & eGISEC 2026
- Event Dates: 18 – 20 March, 2026
- Venue: Hall 3-5, KINTEX 1, Republic of Korea
- Website: <https://www.seconexpo.com/2026/eng/main.asp>

SECON & eGISEC 2026 Kicks Off Under the Theme “Building Trust in the Age of AI”

Asia’s Largest Integrated Security Exhibition Opens in Korea

- Asia’s leading integrated security exhibition, showcasing comprehensive physical and cybersecurity solutions and the latest industry trends
- Featuring 400+ exhibitors from 19 countries and regions, presenting cutting-edge security technologies and solutions to more than 30,000 visitors
- Hosting 100+ qualified overseas buyers from 12+ countries through a dedicated business matchmaking programme
- 20+ conference tracks and 100+ sessions covering advanced security technologies, including the Δ ASIS Conference, Δ APSA Conference, and Δ Security World Conference

AI Era: Integrated Security as a Key Priority

As artificial intelligence (AI) evolves beyond a mere tool to perform autonomous tasks, ensuring trust and security has become a critical priority for both governments and enterprises. AI agents can leverage systems and data to enhance operational efficiency, but they also pose tangible risks, including access to sensitive information and potential misuse.

Recently in South Korea, ransomware attacks and data breaches have targeted major telecommunications companies, financial institutions, and e-commerce platforms, highlighting the growing need for integrated management of cyber and physical security. In response, the Korean government has strengthened its security framework by announcing a comprehensive information security plan that includes AI-based hacking detection, identification of critical system vulnerabilities, and expansion of the white-hacker programme.

Similar trends are being observed internationally. The United States has warned of an increase in AI-IoT hybrid attacks targeting critical infrastructure, while Europe and Japan are enhancing AI-based detection systems to counter sophisticated threats to industrial control systems (ICS) and smart infrastructure. As a result, integrated security strategies

encompassing AI threat detection, OT/ICS security, and smart city protection are expected to become the key driver of the global security market over the next 3–5 years.

Against this backdrop, SECON & eGISEC 2026 will take place on 18-20 March at KINTEX 1, Korea. Celebrating its 25th anniversary, the event is Asia's only integrated security exhibition covering both physical and cybersecurity, providing a platform to experience the latest market trends and technologies while connecting with industry-leading companies and experts.

SECON & eGISEC 2026 will showcase a comprehensive range of integrated security solutions, including Video Surveillance, AI Security, Smart City Security, Industrial Security/OT Security, Access Control, Homeland Security, Social Security, Cyber Security, Fault Diagnosis and Monitoring, Network, and Backup & Recovery—all in a single venue.

Global Security Hub with 400+ Exhibitors from 19 Countries & Regions

This year, over 400 companies from 19 countries and regions will participate, showcasing their latest security products and solutions. During the exhibition, more than 30,000 visitors are expected to attend, including security, safety, and defense officials from around the world.

Visitors will include a wide range of decision-makers and professionals across the security sector, such as security and information protection officers, procurement managers, system operators, Chief Information Security Officers (CISOs), Chief Privacy Officers (CPOs), Chief Information Officers (CIOs), as well as developers, programmers, and other industry professionals.

Conferences and Seminars: 20+ Tracks, 100+ Sessions Over 3 Days

Alongside the exhibition, concurrent conferences will cover the latest security technologies and insights across more than 20 tracks and 100 sessions over three days.

Key programmes for international attendees include the Δ Security World Conference 2026: Empowering Trust in the Age of AI, followed by six sessions: "AI Security Threats and Countermeasures – Yonsei University," "The security balancing act in the 20-Year AI Wave - OMDIA APAC," "Do Antivirus Solutions Really Protect? An Experimental Evaluation – KAIST Cyber Security Research Center," "Securing the Future: Building Antifragile Supply Chains in a Volatile World – TAPA APAC," "Development of an open video security platform technology with on-device self-security by design – ETRI," and "Engineering Accountability: Security Leadership in the Age of AI – GH Solution." The conference will take place on 19 March 2026 at 11.00am in Conference Room 212, with Korean–English simultaneous interpretation provided.

International programmes also include △ ASIS International Conference on 18 March 2026 at 2.00pm in Conference Room 301, as well as △ Asia Pacific Security Association Seoul Conference and △ 2026 China–Korea Digital City Technology Application Conference on 19 March 2026 in Conference Room 303. Sessions will run from 10.00am–12.00pm and 2.00pm–5.00pm, respectively. All international programmes will provide Korean–English interpretation.

Seminars will also be held within the exhibition hall. At Booth D115, exhibitors will present Exhibitor Technical Seminar showcasing AI-driven intelligent security technologies, OT and smart infrastructure protection, next-generation authentication, and integrated security strategies. These sessions will demonstrate practical applications and provide opportunities for business discussions with visitors.

Additional programmes include △ e-Government Information Security Conference 2026, △ Quantum Security Forum, △ Integrated CCTV Control Conference 2026, △ 2026 Industrial Security Trend, △ CPO Workshop 2026, △ 2026 Information Security R&D Project Technology Transfer Conference, △ Personal Information Protection Expert Instructor Forum, △ KAPIE AI & Security Symposium, and △ 2026 International Conference on Counter-Terrorism, addressing key issues across both physical and cyber security.

Overseas Business Networking and Support Programmes

This year, more than 100 overseas buyers and delegates from over 18 countries and regions have been officially invited, along with representatives from more than 70 institutions and associations. Delegates from the Security Association of Singapore (SAS), Hong Kong Police Force, and Asia-Pacific Security Association (APSA) will engage in official meetings with relevant Korean institutions and business discussions with exhibitors. In particular, SAS is expected to sign MOUs with Korean security institutions on site, further expanding collaboration opportunities through SECON & eGISEC 2026.

Sustainable & Startup Support Initiatives – SECON & eGISEC 2026

SECON & eGISEC 2026 supports innovative ICT and security startups through the K-ICT Startup Pavilion, providing enhanced visibility and business networking opportunities with industry stakeholders. In line with its sustainability commitment, the exhibition expanded paperless operations through digital platforms, reduced printed materials, utilized certified recycled paper where necessary, and minimized waste by limiting carpet usage and promoting reusable materials across the venue.
